Overview

Around the globe, the  is known as THE Symbol of Protection. Our quality-first attitude drives Potter to develop and manufacture the best and most reliable sprinkler monitoring, corrosion protection, fire alarm, and security products available today. From the technology behind our products to the interfaces our customers use, we are always challenging ourselves to design, manufacture, and support the best of the best.

“...we are always challenging ourselves to design, manufacture, and support the best of the best.”

Potter enjoys a tradition of over one hundred and fifteen years of dedication to safety and the prevention of loss of life and property. When it comes to quality, we are in a class by ourselves.

Global Potter Network

Fire Sprinkler Monitoring

Potter is the worldwide leader in the Fire Sprinkler Monitoring market. Potter continues to provide the industry with the most innovative Flow, Pressure, and Tamper switches available. However, we do not just rely on our history to carry us forward. Potter continues to bring the latest technology and innovation into the industry.

Corrosion Solutions

Minimizing your liability for damage caused by leaking or broken fire sprinkler pipes requires diligent corrosion monitoring. You need a resource you can trust to protect the sprinkler systems you design or install.

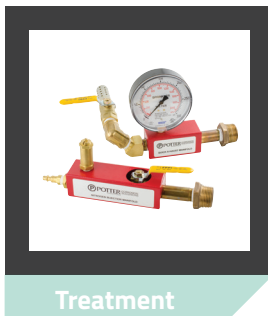

With more than 115 years of sprinkler monitoring experience, Potter is the trusted source for corrosion monitoring and prevention. With our comprehensive suite of corrosion solutions, you can rest assured that whether you want to protect your investment in a fire sprinkler system, or need to find a more permanent solution to a corrosion problem, Potter has the most innovative and reliable products on the market to get the job done.

Fire Alarm Systems

When it comes to fire protection companies, Potter stands apart. Potter produces a full line of fire alarm and notification devices incorporating capabilities such as panel e-mailing and IP connectivity. Potter's UL approved fire systems are available from 30 points to 1,016 points.

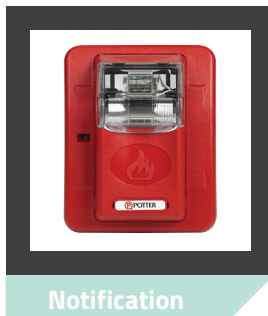

Potter offers a complete line of fire alarms, voice evacuation products, control panels and accessories.

In 2015, Potter acquired Harrington Fire Alarm, Evax Systems and CPG Signals not only to strengthen Potter's position as a leader in products of life safety, but also to expand the range of products and services available to meet all your fire protection needs. By incorporating the technologies of these products, Potter expanded its product lines of fire and voice system, facilitating even greater access to the markets that our customers serve.

Security

Some of Potter's greatest innovations come from our focus on Security protection. What started as an experiment in private security, has grown into an extensive line of vault/safe protection products, sounders, and a large array of various security detection devices.

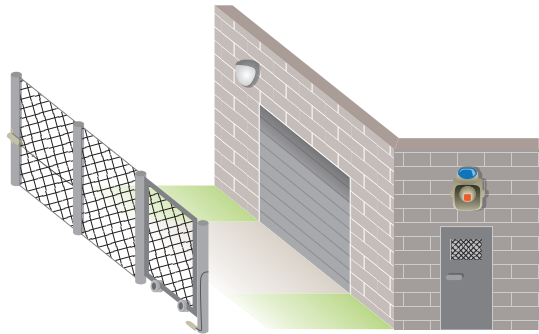

In 2004, Potter acquired American Security Equipment Company (AMSECO) to expand our security product line and provide our customers with a wider variety of high quality products. The AMSECO brand name now constitutes our full line of magnetic contacts, sirens/strobes, and people counters.

In 2008, Potter acquired Elmdene International to help expand our technology and reach into the European marketplace with a vast array of power supplies, sounders, detection and hold up devices.

With Potter Security devices, your entire perimeter is protected.
